Art Unit: 1797

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/14/07 has been entered.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4 and 8-9 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The filter media having a central opening and the end supporting a second tube in fluid communication with the cavity, a third tube at other end of the housing in fluid communication with the central opening are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Without the filter media (32) having a central opening (52), the end (15) supporting a second tube (18) in fluid communication with the cavity (30), a third tube (20) at other end of the housing (12) in fluid communication with the central opening (52), the fluid to be filtered cannot flow into the second tube (18) i.e. inlet tube and the filtered fluid cannot flow out to the third tube (20) i.e. an outlet tube as intended (see Figures 1-2). Without above structural elements, the claimed apparatus would not work as intended since no inlet tube for providing fluid inflow and an outlet tube for filtered fluid exit are provided. See paragraphs 0014-0019 for the essential need of above structures.

4. Claims 11, 13, 15 and 24-27 are allowed.

Art Unit: 1797

5. Applicant's arguments with respect to claims 1-4, 8-9, 11, 13, 15 and 24-27 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kim whose telephone number is 571-272-1142. The examiner can normally be reached on Monday-Friday 7 a.m. - 3:30 p.m..
